Mongolian Fun Facts:

Mongolia is the 19th largest country in the world and the 2nd largest landlocked country, yet it has one of the lowest population densities due to its harsh terrain and extreme climate.

Known as "Land of the Eternal Blue Sky," Mongolia enjoys sunshine up to 250 days a year, but summers last only a few weeks before the long winter sets in, with temperatures plunging to -30°F.

Mongolian Fun Facts:

There are almost as many horses as people in Mongolia. A local saying goes, "A Mongol without a horse is like a bird without wings." The country is also known for snow leopards and two-humped camels.

More than a quarter of Mongolians are nomads, living in harmony with nature. They move their livestock with the changing seasons and are famously hospitable.

Mongolian Fun Facts:

Genghis Khan created the largest contiguous empire in history, stretching from Eastern Europe to the Sea of Japan – over 12 million square miles.

Genghis Khan created one of the first international postal systems, the “Yam,” a network of riders and stations that could carry messages up to 200 miles a day across his empire.

Fun Khan Joke: What do you call a feud between two of Genghis Khan's generals?

Mongolian beef.
